

FIXING. WRAPPING. PACKAGING.

WHO WE ARE.

Faehrenkaemper Development and Marketing Company, FEV for short, was founded in 1998. Emerging from the company founded in 1947 – Faehrenkaemper GmbH & Co. KG – we have taken our many years of experience and know-how originally developed for the floristry industry and put it to use in special purpose machinery manufacture and expanded it to incorporate further industrial sectors.

Our dynamic team is made up of qualified engineers and excellently trained technicians and electricians. At our Loehne headquarters we produce future-oriented and efficient packing machines and all-in-one solutions.

We always work closely with our customers when designing and realising specific customer requirements. In the process we review and discuss the respective

conditions on site and develop customised packing solutions. In addition, we provide a wide range of offerings on standard machines that have manifold uses on the market.

Our well-organised and professionally qualified sales team ensures that we remain in close contact with our customers. Our service technicians react quickly and reliably to individual requests and thus guarantee the highest level of customer service. See for yourself.

Yours faithfully,

A handwritten signature in black ink, appearing to read 'F. Faehrenkaemper'.

Frank Faehrenkaemper
Managing Director

WHAT WE MAKE.

Our profession is the manufacture of packing machines that operate with winding rings of variable diameters. During the wrapping process in the machine your product is held in place by hold-down devices and centring devices and automatically transported. For this reason, no additional personnel are necessary.

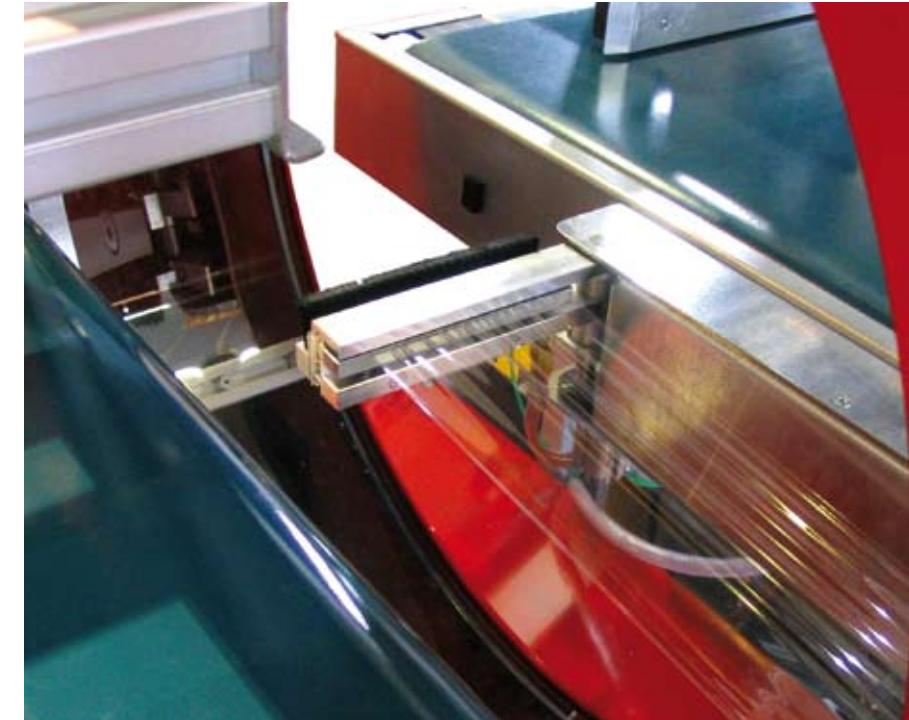

Our machine technology is based on a well-thought out system that has been proven on the market. The process uses a combination of product feeding and an extremely high winding ring speed all with a very smooth running of the machine. The noise emissions from the machines don't interfere with your business operations.

Due to the use of brand name components from suppliers that have been proven over many years on the market (pneumatics, electronics, PLC), we guarantee the highest level of quality in our machines according to German machine construction standards. Of course this also applies to subsequent spare parts supply – even after many years of machine operation.

MACHINE FEATURES

- Always the latest state-of-the-art technology
- Outstanding machine flexibility
- High winding ring speed
- Extremely efficient processing speeds
- Well-engineered machine technology
- Simple operation
- Silent running
- Exclusive use of brand name components
- Minimal downtimes
- Maximum operator safety
- CE Marking
- Quick spare parts supply
- Reliable service

PACKING FEATURES

- Packing at optimal cost
- Adapts flexibly to packing demands
- Packing without product damage
- Environmentally-friendly packing

WHO OUR CUSTOMERS ARE.

Our machines are used in the most varied industrial sectors and in virtually all manufacturing businesses.

Whether used in the metal or furniture industries, for tyre production or in construction – when it comes to packing machine manufacture, we set standards for a wide range of industries. And we do it exactly to fit your needs.

METAL INDUSTRY

Steel Wholesale | NE (non ferrous) Metal Trade | Anodising Plants/Powder Coaters | Aluminium (profile) Manufacturers

KUNSTSTOFFINDUSTRIE

Manufacturers of Plastic/PVC Profiles and Tubes | Manufacturers of Roller Shutter Housings

CONSTRUCTION INDUSTRY

Fittings Manufacturers | Manufacturers of Insulation and Soundproofing Materials | Ladder Manufacturers | Gate and Door Manufacturers

TYRES AND WHEELS

Manufacturers of Car and Motorcycle Tyres | Manufacturers of Complete Wheel Sets | Tyre Wholesale

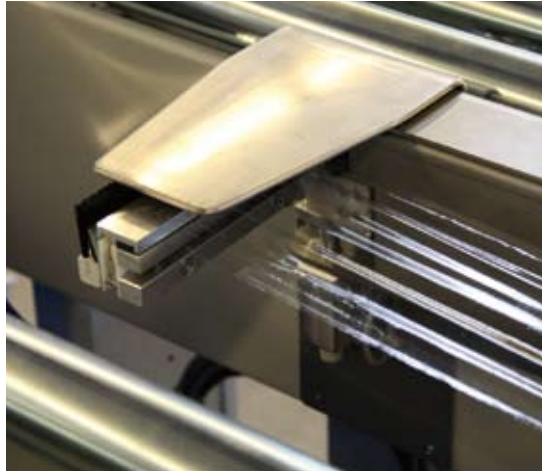

FURNITURE INDUSTRY

Kitchen and Bath Furnishings Manufacturers | Manufacturers of Furniture Fittings | Manufacturers of Plinth Strips and Cornice Profiles and Unassembled Goods

WOOD INDUSTRY

Planing and Sawing Mills | Manufacturers of Wooden Flooring and Panelling, Tongue and Groove Boards | Manufacturers of Wooden Mouldings and Rods
